Applying the Assertion Model

- Focus on the common goal: quality care, the welfare of the patient, safety –it's hard to disagree with safe, high quality care

- De-personalize the conversation
- Actively avoid being perceived as judgmental
- Be hard on the problem, not the people

Assertion - The Bottom Line

Stay with the issue until you are clear that the **PROBLEM**, the **PROPOSED ACTION**, and the **DECISION** are understood by all parties

You may not always get the **DECISION** you want, but at least everyone will be having the same conversation.

In their interactions, effective team members are mutually respectful of each other
